

## Simple Green Anti- Bacterial Concentrate and Ready to use formulations

## Focusing on COVID 19 Bulletin 02/20

"Coronaviruses are a large family of viruses, some causing illness in people and others that circulate among animals, including camels, cats and bats.

..

Both MERS and SARS have been known to cause severe illness in people. The situation with regard to 2019-nCoV is still unclear. While severe illness, including illness resulting in a number of deaths has been reported in China, other patients have had milder illness and been discharged."

Regarding exactly how to deal with prevention, the CDC has only issued interim guidance ... there could be more specific and detailed information to come:

Clean all "high-touch" surfaces, such as counters, table tops, doorknobs, bathroom fixtures, toilets, phones, keyboards, tablets, and bedside tables, every day. Also, clean any surfaces that may have blood, body fluids and/or secretions or excretions on them.

Read label of cleaning products and follow recommendations provided on product labels. Labels contain instructions for safe and effective use of the cleaning product including precautions you should take when applying the product, such as wearing gloves or aprons and making sure you have good ventilation during use of the product.
