

BRITELEA 2755

| | |
|----------------|--|
| Description: | Yellow coloured bar |
| Abrasive type: | Calcined alumina |
| Application: | Good, general purpose compound for cut and colour on a variety of ferrous metals for the removal of 280 pre-polishing lines. |
| Metal type: | All ferrous metals including exotic types. |
| Buff type: | All types of sisal buffs and also ventilated cotton and full disc stitched buffs. |
| Performance: | Cut : 9 Colour : 5 |

Comment:

- Very good cut and colour compound for ferrous metals, producing a fine lined finish suitable for final finishing stage.
- No animal derived products are used in the ingredients

Note: Second operation: **Nico Pink** (see Product Information Sheet) to produce a final colour/finish on all metal types.
