

WAX 25

Description: Beige / Cream coloured bar

Application: Fine finishing of plastic or lacquered components

Buff type: Soft, ventilated cotton buffs, Swansdown, molton or flannel buffs

Performance: Produces a high gloss finish on plastics, polyesters or lacquered surfaces

Comment:

- Leaves a clean, non-greasy surface
- Can also be used for fine finishing of wood surfaces

Designed to have slightly less "cut" than **WAX 108** (see Product Information Sheet). For more aggressive cutting action prior to final finishing Lea have developed **Plasticut**. Ask your Technical Sales Adviser for details.
